

CEF 512: ERP System Engineering

Presenting the paper: *ENTERPRISE
RESOURCE PLANNING: A TAXONOMY OF
CRITICAL FACTORS (MAJED ALMASHERI
ET AL)*

By

Alangi Derick NN (FE12A113)

Outline

- Paper outline
- Document content
- Critics and justification

Paper overview

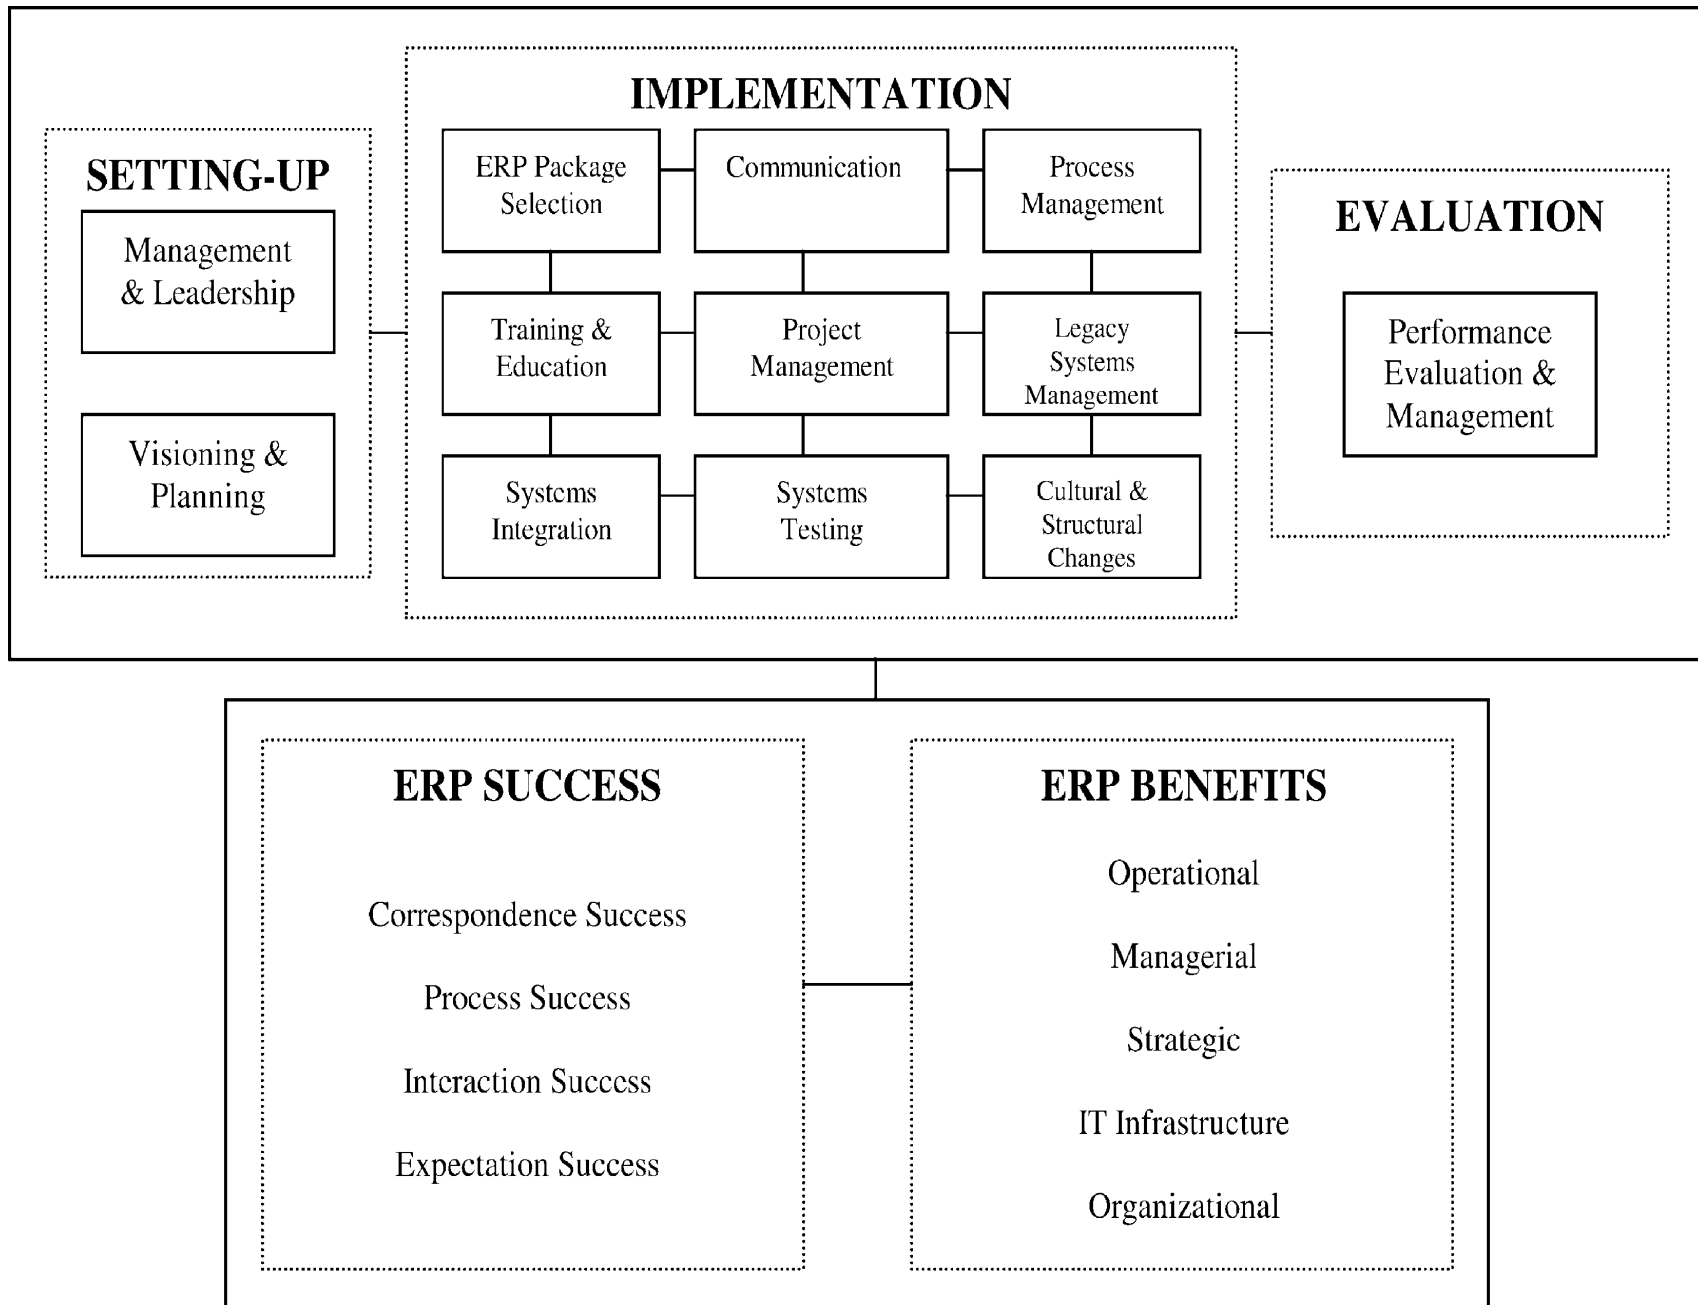

ERP is a customizable modular software package which is interactive and can be either on-line, off-line or both, installable on a single computer or a network of computers using only a single database

Paper overview

Paper overview

- ERP Systems alone are expensive (from 100s Millions to Billions of FCFA).
- It will even cost more when services of a consultant familiar with the ERP System are hired.
- New hardware and Databases may even push the prize further.
- Training and change management cost.

Justifications

The Figure on critical factors give more light to points and good flow.

Simple and clear language

The title of the document is in-line with the content of the document

Critics and justifications

- Some acronyms like SAP-AG, SCM, BPM are not given their full definitions
- Arrows were not used to show the direction of flow of the activities
- Font-size small
- Organization of work into 2 columns make it difficult to read
